

## HOW TO GET YOUR COVID-19 TEST RESULTS

1. You must include your email address on the form you fill out the day of testing. **You will not receive results if an email is not listed on the form.** (If you are being tested with a family, you can put the same email address for all people tested.)
2. When your results are ready, you will receive an email at that address from CareEvolve.
3. This email will contain a registration code and a link that you need to click on. There will be two links in the email—click on the first one.
4. The link will open a browser and take you to the Broad Institute website so that you can register to see your results.
5. To register, use the same email address and the registration code that was sent to you.
6. After registering, you will receive a second email confirmation. This second email will have a link that takes you to your test results. Please remember this will include your private and protected medical information and to handle with care.
7. Below is an example of the process of registering for results.

*input your  
email & code to  
register for results!*
