

Stop the Spread COVID Testing Site

Instructions for Obtaining Your Test Results

1. Be sure to correctly enter your email address when you book the appointment. This is how your results will be sent to you. You will not receive results if an email is not listed on the form. *(If you are being tested with a family, you can put the same email address for all people tested.)*
2. Be sure to include a mobile/cell phone number as this is how your appointment will be confirmed.
3. When your test has been processed, you will receive an initial email at the email address you provided. The email will be from CareEvolve. If you do not see this within a day or so of your test, be sure to check junk mail and spam folders.
4. This initial email will tell you how to establish your account with the testing lab (Broad Institute). The email will contain a registration code and a link that you need to click on. There will be two links in the email—click on the first one.
5. The link will open a browser and take you to the Broad Institute website so that you can register to see your results.
6. To register, use the same email address and the registration code that was sent to you.
7. After registering, you will receive a second email confirmation. This second email will have a link that takes you to your test results. Please remember this will include your private and protected medical information and to handle with care.
8. Below is an example of the process of registering for results.

Input your email & code to register for results!
