

Honorary Chair

Congressman Joseph Kennedy III

“Heartbreaking stories of loved ones lost to substance abuse and addiction have become far too common for families in every corner of our country. Whether by strengthening prescription monitoring, increasing access to Naloxone, or supporting additional treatment methods and centers, we must use every tool at our disposal to combat this epidemic. SSTAR has proven to be a global leader in addiction treatment and healthcare. With a new state-of-the-art treatment center, SSTAR can expand research and continue to integrate primary and behavioral health care to build on our efforts to support the families and communities devastated by our country's addiction crisis.”
